Call for Papers

The aim of this symposium is to provide a forum for researchers and technologists to present new ideas and contributions in the form of technical papers, panel discussions, as well as real-world evaluations in the field of wireless communications, signal processing and networking. We call for highly innovative and state-of-the-art contributions in the form of original technical papers. Demos or products to be shown at the accompanying exhibition are also sought. Accepted and presented papers will be published in the conference proceedings and submitted to IEEE Xplore and other Abstracting and Indexing databases.

Track 1: Signal processing for wireless communications, communication theory, information theory, antennas and propagation

Track 2: Networking, protocols, cognitive radio, wireless sensor networks, services and applications

Submission Guidelines

Only full papers are considered. The length should not be longer than five A4 pages (in IEEE two-column format, 10pt, according to the IEEE template). Papers must be submitted via EDAS.
